

# Lesson Design Tools in SMART Notebook

## Page Design

- Add a background color to a page
- Use a Gallery background
- Use an image from the Internet as a background (lock it in place)
- Scan an image and insert it as a background
- Add images from the Internet as objects (copy/paste, insert picture file)
- Use a variety of fonts, font styles, font sizes and font colors
- Use pull tabs to reveal answers
- Use the eraser to reveal answers
- Clone a page to create an answer page
- Extend a page to create additional room for lesson objects
- Plan the use of Dual Page view for a lesson activity
- Apply the shade to lesson page to prevent the display of content
- Title pages in a lesson

## Linking

- Create image hyperlinks to Internet sites
- Create text hyperlinks to Internet sites
- Create hyperlinks to other pages in the Notebook file
- Create hyperlinks to other (attached) files
- Use corner icons for links
- Use entire objects as links
- Link to a page in a lesson to reveal answers

## Attachments

- Attach a copy of a file to a lesson
- Attach a shortcut to a file on the computer
- Attach a hyperlink to an Internet site as an attachment
- Attach a homework assignment or worksheet to a lesson

## Modify Objects and Their Properties

- Clone objects to use in lesson activities
- Use the Infinite Cloner to create objects for lesson activities
- Order objects to create lesson activities, reveal content or answers
- Have students group objects as a lesson activity
- Lock objects in place
- Properties: Fill color, outline color, line thickness, line style, transparency

## Multimedia
